Your Natural 'Filter'

illumiFacial®

illumiFacial® is the 'next generation' of the highly successful 'Photofacial' treatment, using a new and unique combination of specialist Lynton skincare together with powerful, medical-grade Lynton IPL technology.

This quick and simple facial treatment dramatically improves skin tone and appearance, helping your skin feel and look its best.

Your Natural 'Filter'

“ My skin was really starting to show the effects of my busy schedule and love of the sun! My skin now looks clearer and fresher ”

“ My face looked and felt tired and had lots of discolouration. illumiFacial really helped clear and firm my skin”

Why choose an illumiFacial?[®]

4 Stage Treatment...

1. Cleanse

The first step in achieving clear, healthy, radiant skin will involve a deep cleanse, with your illumiFacial® practitioner using a specialist formulation to remove any impurities.

2. Tri-Fruit Acid Peel

Following a deep cleanse, a unique Tri-Fruit Acid Lynton Fruit Peel will be applied to your skin, for anywhere between 3 - 10 minutes. This peel resurfaces skin texture and decongests pores, priming the skin ready for stage 3 of illumiFacial®.

3. Lynton IPL

Post fruit peel, your skin will be at its optimum condition for the application of the award-winning Lynton Intense Pulsed Light (IPL) treatment. This works by both stimulating collagen and targeting any discoloration on your skin, e.g. freckles, pigmentation, vascular breakouts, general redness. In most cases, the results are instant, providing you with dramatically clearer, firmer skin.

4. Hydrate & Protect

To help maximise the results of your illumiFacial® treatment, a trio of specialist serums will be applied to your skin post-IPL, helping soothe, regenerate and protect your skin.

Am I suitable for illumiFacial®?

Treatment is perfect for anyone whose skin exhibits congestion, discolouration and visible signs of ageing, however, a full consultation is carried out prior to treatment to ascertain your suitability and individual treatment needs. A full treatment plan will then be tailored to treat your specific concerns, all aiming to improve the appearance, feel and health of your skin.

What should I expect after illumiFacial®?

You may experience a superficial tingling feeling on the skin and you may see a darkening of pigment spots before they flake away - this means the treatment has worked perfectly in providing you with a more even, flawless skin tone. As well as clearer, healthier skin, you will also experience an ongoing improvement to the firmness and plumpness of your skin in the following months post-treatment, as new collagen is stimulated deep within the skin tissue.

How does the treatment feel?

illumiFacial is a very quick, comfortable treatment which is designed to provide you with 'optimum skin health'. Some people will feel a slight tingling sensation when the fruit peel is first applied, but it very quickly subsides. The IPL aspect of this treatment can sometimes be mildly uncomfortable - most people describe the discomfort as feeling like a 'quick pinprick' and 'warm feeling', which is very tolerable.

Are there any side effects?

The illumiFacial is a completely non-invasive treatment, using safe, medical-grade equipment to minimise side effects. Your skin may be red and slightly swollen immediately after treatment, but this will subside very quickly. You may also have some patches of dry skin and in very rare cases, a small blister can form with some temporary lightening or darkening of the skin. However, most people experience absolutely no side effects and any reactions usually disappear within a few hours, leaving the skin feeling and looking radiant.
